Git Commands

Git add .

-Add all new files that are untracked by Git

Git Status

-Shows all files that Git has been following within the repositories

Git Fetch

-Copies new files from the central repository and then downloads but does not merge with the

Local repo.

Git Pull

-Copies and merges files from central repo to local repo, keeping it updated.

Git ls –la

- Shows any data in the directory

Git code "filename.md"

- Opens the file in chosen code editor
